Key events and achievements

Rába Axle Ltd. signed a supplier and long-term cooperation agreement for the strategic period 2007-2010 for an aggregate value of EUR 67 million with the bus division of the GAZ group. The agreement is expected to generate sales in the amount of EUR 13.1 million this year. The sales revenue of the Axle Business increasing year on year is due to the expanding customer base and the increasingly comprehensive product range. The parties also agreed to set up a joint working group aimed at deepening their cooperation in the fields of both axle development and production.

Rába Axle Ltd. and ArvinMeritor have signed a three-year general supply contract based on which the company began the supply of forged, machined front axle blocks as from Q2 of 2007. The expected sales of this strategic product will reach EUR 4 million annually in 2007 and starting in 2008 the annual volume of front axles supplied may reach EUR 6.5 million. This is fully in line with the repeatedly published strategic objectives, according to which Rába wishes to step up its West European sales. ArvinMeritor seated in America is the full fledged axle supplier of the Volvo group within road vehicle manufacturing in Europe, thus the business has through ArvinMeritor become the axle parts supplier of the Volvo group of companies (Volvo and Renault trucks).

Continued lower indirect costs are the result of stringent cost control and of the positive impact of the space consolidation and of the relocations.

No major real estate sales occurred during the period.

Headcount efficiency improved by 13% during the first 6 months compared to last year, the closing headcount of the group declined to 2848 people.

Sales and position of strategic markets:

On the **American market**, the sales revenue during the first 6 months was USD 37.1 million, against USD 33.2 million during the first 6 months of 2006. This means an increase of 11.7%, resulting from two opposite effects: the period was characterised on the one hand by the substantial, temporary decline of the heavy vehicle market, which was offset by the expansion of the cooperation with our strategic partner in the field of special axles.

On the **EU market** Rába's sales figures in HUF terms increased by 11.5%, amounting to HUF 16.5 billion, compared to HUF 14.8 billion of last year.

European exports amounted to EUR 23.8 million during the first 6 months of 2007 compared to EUR 21.6 million during the same period of last year. This corresponds to an increase of 10.2%, to which the Axle business contributed EUR 13.7 million, the Component business contributed EUR 8.7 million and the Vehicle business EUR 1.4 million. In the case of the Axle business, European exports declined by 3.5% on the whole, mainly since Rába's products sold earlier to the European subsidiaries of Dana are now increasingly sold to the Győr plant of the partner. The exports of the Component business increased by nearly 36% in this relation.

Domestic sales amounted to HUF 10.5 billion during the first 6 months of 2007, which is an increase of 15.1% compared to HUF 9.1 billion of the first 6 months of 2006. The sales generated by the Axle business increased by 21%, that of the Component business by 42%, as a result of the increase in the sales revenue generated by the Suzuki and the Axle business sales. Domestic results were deteriorated by the drastically fluctuating during the year, 14% lower sales revenue of the Vehicle business.

On the **CIS and East-European markets** export sales revenues achieved by Rába increased substantially by 28% from EUR 9.8 million during the base period to EUR 12.5 million during the first 6 months of 2007. The increase continues to be attributable to the increase in the demand on the Russian market and the expansion of Rába's strategic relations.

On the **other markets** the sales revenue achieved during the first 6 months of 2007 amounted to USD 1.2 million, against USD 3.1 million of last year. This sales revenue is generated almost entirely on the Japanese market. Additionally, there was a sales revenue item of EUR 2.9 million treated on a project basis.

During the first 6 months of 2007, Rába achieved HUF 27,433 million in sales revenue, compared to HUF 25,076 million during the same period of last year. 61.8 per cent of the revenues came from export, the rest came from domestic sales.

2. EXPENSES AND OTHER REVENUES

2.1. Direct costs

During the first 6 months of 2007 the direct cost level of Rába was at 81.1 per cent, versus the 76.6% cost level characteristic for the first 6 months of 2006.

2.2. Gross Profit

The gross profit changed from HUF 5,867 million to HUF 5,185 million, which is due to the increase in the sales revenue (+ HUF 2,357 million) and to the significant increase in direct costs (+ HUF 3,039 million). Compared to the favourable development of the exchange rates in the first 6 months of 2006, the first 6 months of 2007 saw a significant deterioration (USD: 212.8 in the first 6 months of 2006, 188.1 in the first 6 months of 2007, EUR: 262.7 in the first 6 months of 2006, 249.8 in the first 6 months of 2007).

2.3.Cost of sales

Other revenues amounted to HUF 410 million in the first 6 months of 2007. This amount was HUF 154 million (37.3 per cent) lower than that of the base period. 3. ("OPERATING") PROFIT BEFORE INTEREST PAYMENT AND TAXATON

The profit of Rába before interest payment and taxation in the first 6 months of 2007 was HUF +113 million (the first 6 months of 2006: HUF 305 million). The decline in the gross profit is HUF -682 million, which was improved by the decline in the cost of sales and administrative costs (HUF 644 million) and deteriorated by the decline in other revenues as outlined in section 2.5 (HUF -154 million). Profitability declined from 1.2% during the base period to +0.4%. The profitability of operating profit + depreciation increased from +6.4 per cent to +6.1 per cent.

4. FINANCIAL REVENUES AND EXPENSES

4.1. Net financial result

In the first 6 months of 2007, the net gain on hedging transactions amounted to HUF 656 million, the gain during the first 6 months of 2006 was HUF 749 million.

The components of this are as follows:

The unrealised gain on the revaluation of forward transactions as at 30 June 2007 was HUF - 82 million, against HUF -2,031 million during the base period. The unrealized gain of the forward transactions of December 31st 2006 was released during the first 6 months of 2007, the financial impact of which was HUF -682 million (the same value during the first 6 months of 2006 was +1,357 million). Net financial results also include the effect of the revaluation of debts, accounts payable and accounts receivable, which in the first 6 months of 2007 was HUF +199 million, and HUF -967 million in the first 6 months of 2007. Based on the above, the net financial result was HUF -73 million during the first 6 months of 2007 (the first 6 months of 2006: HUF -1.187 million). The profitability index represents a 0.1 per cent return on sales on the basis of profit before taxation, compared to -3.5 per cent during the base period.

In the case of Rába, the differences between the profit and loss accounts prepared according to the Hungarian Accounting Standards (HAS) and the International Accounting Standards (IFRS) are predominantly due to the following factors:

- revaluation of forward transactions and reversal of the revaluation of the previous year,
- accounting under IFRS as costs of technical development, foundation and reorganisation expenses capitalised according to HAS,
- treatment as financial leasing of production equipment purchased as operating leasing within the group,
- accounting of the treasury shares purchased by the employees of the company on a monthly basis,
- accounting of the share options made available to the managers within the Share Option Programme.

PK. 3. CONSOLIDATED BALANCE SHEET ACCORDING TO IFRS

I. Analysis of principal balance sheet items and their changes

1. INVESTED ASSETS

1.1. Properties, machines and equipment

The consolidated net value of properties, machines and equipment changed from the closing value of HUF 18,003 million of the previous year to HUF 16,478 million. The principal reason for the change is due to the fact that the book value of HUF 1,799 million of the Railway vehicle site to be sold to the Engel Group was reclassified by the Company in December of 2006 as assets for sale within current assets, since according to our current position, these assets do not serve the activity of the enterprise in the long run. The revenues expected from the business are going to significantly exceed the book value of the property.

1.2. Intangible assets

The net value of intangible assets was HUF 59 million, HUF 70 million less than that of the base period. Rába NyRt. has only licences among intangible assets. The decline corresponds to the depreciation between the two periods.

1.3. Long-term participations

This balance sheet line shows the proportion of an associate enterprise relating to the parent company. On 30 June 2007, it amounted to HUF 0, i.e. it was identical with the base period.

1.4. Other participations

Some of the other participations include subsidiaries not involved in the consolidation, and the rest are other participations, in the case of which Rába's stake is less than 25 per cent. Their closing figure as at 30 June 2007 was HUF 3 million, which is HUF 1 million less than during the base period, due to the sale of the stake in MI Technik Alkatrésztesztelő Kft.

1.5. Other investments

The closing value of other investments was HUF 3 million, which was HUF 3.5 million below the previous year's figure.

1.6. Long-term receivables

This balance sheet line shows long-term receivables on a discounted value among invested assets in the balance sheet. Long-term receivables include the following items:

1.7. Deferred tax

On 30 June 2007, the deferred tax amounted to HUF 853 million, HUF 1.2 billion less than the value as at 30 June 2006. The change is due to the change in tax liabilities as detailed under section 5 and to the release at the end of 2006 of HUF 832 million of the deferred tax claim set aside for the loss of the previous years, since the enforceability of this tax claim is uncertain because of the expected changes in taxation policy and the profits expected within the foreseeable future.

On 30 June 2007, the closing value of stocks was HUF 9,963 million (30 June 2006: HUF 8,455 million). million, an increase of 3.3 per cent over the base period (closing figure for the first 6 months of 2006: HUF 8,681 million). The increase is due to the following factors:

- Increase in accounts receivable (HUF 2,486 million) due to the fact that Rába has offered several major customers longer payment terms in order to secure sales growth,
- Accruals of proceeds from forward transactions of the end of 2006, closed but still uncollected (HUF 647 million)
- Accounting of unearned gains of the revaluation on 30 June 2007 of forward transactions (HUF 82 million)

- A significant customer receivable collected during the last days of the period.
